

FOR IMMEDIATE RELEASE

DAYSTAR COMPUTER SERVICES OPENS NEW OFFICE

Expands and enhances facilities and services to support area's small to medium-sized businesses

NEWINGTON, NH – July 26, 2007 – To support the diverse and increasingly complex technology needs of small and medium-sized businesses, Daystar Computer Services is pleased to announce the opening of its new facility, located at 121 Shattuck Way in Newington, NH. Daystar, a full-service technology reseller and provider of business-class computer, networking and programming services, specifically designed the office to address three strategic areas: continuous growth in its client base; the addition of new services; and an enhanced infrastructure to support future technologies.

“Our clients trust Daystar to provide skilled, practical technology management and services on which their businesses rely. It is our responsibility to ensure we have the infrastructure in place to meet their growing needs,” said Keith Bamford, chief executive officer and co-founder of Daystar Computer Services. “This new facility ensures that Daystar will continue to provide the region’s highest quality business technology services well into the future.”

The building is comprised of 4,200 square feet of premium office space. In addition to housing administrative offices, the facility more efficiently incorporates Daystar’s technical and programming divisions, thus providing for seamless integration across all company services. Space is available throughout the facility for small-group meetings, collaboration and/or training, while a state-of-the-art conference room provides a setting for larger groups.

“As technology continues to permeate every aspect of business operations, our clients’ needs and goals change accordingly. The additional and more efficient use of space provided by our new office allows us to meet the rising procurement demands of our client base,” continued Bamford. “Furthermore, our new infrastructure provides a foundation to support not only our current services, but also the deployment of future technologies.”

Since its inception in 2000, Daystar has purposely developed a superior suite of networking, programming and Internet services designed to create practical, real-world business efficiencies. In the last two years alone, Daystar has added several new services to meet the needs of small- to medium-sized businesses (SMBs), including remote data backup, Microsoft Exchange hosting, Voice over Internet Protocol (VoIP) and online document management.

Daystar Computer Services supports SMBs and organizations across New Hampshire, northern Massachusetts and southern Maine.

About Daystar Computer Services

Located in Newington, NH, Daystar Computer Services, Inc. was founded in 2000 with a single guiding principle: to deliver complete technology solutions and services designed to meet the individual needs and goals of a diverse base of client companies. Providing business-class

computer and networking services to small- and medium-sized businesses, Daystar's main goal is to help our clients learn how they can save time and money by efficiently leveraging computer and networking technology.
