

FOR IMMEDIATE RELEASE

**INDEX PACKAGING RELIES ON DAYSTAR COMPUTER SERVICES
TO DESIGN NEW WEBSITE**

Newly-launched Website showcases product diversity and increases quoting efficiency for local industrial packaging company

NEWINGTON, NH – May 6, 2008 – Daystar Computer Services, a technology provider of Website, custom programming, and computer and networking services, today announced the launch of a new corporate Website for Index Packaging, Inc. In addition to showcasing the company’s comprehensive product lines, the new Website also improves online quoting procedures, enabling the industrial packaging company to respond more quickly to customer requests.

Based in Milton, New Hampshire, Index Packaging has steadily grown into a leading provider of customized packaging solutions for hundreds of customers across the United States. As the company expanded, their existing Website did not fully represent their breadth of services. Furthermore, with no dedicated resource for online quote requests, the existing site did not provide the sales department with the information they needed to respond quickly and easily. Index Packaging needed a Website that showcased all of their products and services and provided a straightforward method to gather appropriate quoting information to effectively communicate with prospective clients.

Daystar Computer Services recommended the development of a new Website with streamlined, user-friendly navigation and online quoting features, integrated with a content management system (CMS) ensuring that the Website could evolve with the company as they grow and change over time. “When we really looked at their underlying needs, we found that rather than bells and whistles, what Index Packaging really required was a streamlined, flexible Website that accurately reflected who they are and, more importantly, was capable of supporting who they intend to be. They needed a solution that would be able to grow with them well into the future,” said Keith Bamford, CEO and co-founder of Daystar Computer Services.

The new Website includes an updated, clean, modern design reflecting Index’s straightforward image. Intuitive site navigation enables visitors to easily find a particular product or service. Product photos are incorporated throughout to further showcase Index’s extensive product capabilities, and an online quote form and supporting back-end system enable Index to more quickly respond to new quote requests. Dedicated to simple, efficient and open communication, it is important to Index that their visitors can quickly and easily contact them from the Website and therefore, include a directory of the company’s main contacts complete with extensions and e-mail addresses.

“We are really happy with the new Website. Index Packaging is a company built on service and quality, and our new site more accurately reflects our company and product offerings. The online quoting process is much more efficient and allows us to quickly respond to our customers’ requests. And knowing that we have the flexibility and control to easily, quickly and cost-

effectively make changes to the site as we continue to grow reaffirms our investment,” said Bruce Lander, president of Index Packaging.

About Index Packaging, Inc.

Index Packaging was founded in 1968 by Bill and Connie Lander with the invention of the TIP (N) TELL shipping indicator. About ten years later, patent rights to the DROP (N) TELL shipping indicator were purchased. In 1981, Index Packaging moved to its current location in Milton, NH with custom wood, foam, and corrugated operations. In 2002, new and recycled pallet operations were added with the purchase of Timber Tech Corp. Today, Index Packaging employs about 140 people in a 120,000 square foot campus style facility and is currently managed by Bill and Connie's son, Bruce Lander. Major products and services include: foam packaging; wood crating; corrugated; recycled & new pallets; Drop (N) Tell and Tip (N) Tell; warehousing & supplies; design support and trucking. As a growing, mid-size company, Index Packaging has the capacity to handle industrial packaging accounts of any size, with a facility outfitted with manufacturing equipment and warehouse space to handle quick-turn, VMI, or standard customer lead times. Index Packaging's overall vision and goal is to satisfy every customer, every time. For more information, please visit www.indexpackaging.com.
