

When your business depends on it...

where will you turn?

Daystar Computer Services was founded in 2000 with a single guiding principle:

To deliver complete technology solutions and services designed to meet the individual needs and goals of a diverse base of client companies.

Our Philosophy

As a technology partner, our purpose is to help our clients meet their business goals. Providing business-class computer and networking services to small- and medium-sized businesses, Daystar's main goal is to help our clients learn how they can save time and money by efficiently leveraging computer and networking technology to operate their businesses more productively.

Our team of experienced technicians, designers and developers is committed to fostering collaborative, partner-driven client relationships resulting in customized service offerings dictated by the client's unique technology requirements. We work to first understand the client's goals, business processes and target audiences. Then, we design the services and solutions to meet those needs.
