

Establish your Internet presence

The Internet is a powerful business tool, limited only by how you use it. It streamlines operations, extends your marketing and advertising reach, and facilitates communication.

In short, the Internet adds real value to your bottom line.

Establish an effective, secure and beneficial Internet presence with Daystar's Internet hosting services. Your Web site, applications and e-mail will be hosted on state-of-the-art, fault-tolerant servers

professionally managed and monitored at a secure, local collocation facility by certified Daystar engineers.

Secure Hosting Facility

- Redundant T3 lines by air, underground & through additional vendors
- APC Battery backup on all servers
- Instant generator on backup
- Fire-protected building
- Climate-controlled facility
- 24x7 building access
- Locked rack
- 24x7 system monitoring

Daystar Servers

Web Site Hosting

Providing fast and reliable support for your Web site, Daystar's servers ensure that your online business is always up and running. Web site hosting services include:

- Server space to post your Web site
- Comprehensive Web reporting details
- Implementation support to assist in posting your site
- Five complimentary e-mail accounts

Plus, Daystar can help secure your identity for a consistent and professional online presence. Ask about multiple and alternative domain names for increasing traffic to your site.

With Daystar's experience in systems integration, commitment to continual maintenance, and readiness preparation, you can be confident in a positive, worry-free Web presence for your company.

E-mail Hosting

E-mail access is vital to communicating in today's business environment. With Daystar's e-mail services, you can easily register your company's unique e-mail address in a cost-effective manner.

Enjoy professional, reliable and fast access to your e-mail using your own local client, e.g. Outlook, Eudora, etc... Or, for increased flexibility, use our Web mail option, a secure, easy way to access your account from any location that has Internet access.
